SUMMARY

Computer Science & Engineering student with hands-on experience in full-stack web development. Proficient in Java and JavaScript. Skilled in designing responsive web applications, developing database-driven systems, and building secure administrative dashboards through academic projects. Strong foundation in Object-Oriented Programming, Data Structures, and problem-solving, with a passion for developing scalable and efficient software solutions.

EDUCATION

B.E. in Computer Science & Engineering – Sipna College of Engineering and Technology, Amravati

- Nov 2022 – Present | CGPA: 7 (Up to 7th SEM) | Expected Graduation: 2026

HSC – Rashtriya Aashram School, Loni - 2022 | 78.67%

SSC – Let Babaraoji Khode Vidyalay, Wadgaon (Ga.) - 2020 | 79.20%

SKILLS

Programming Languages: Java (Core), JavaScript | **Frontend:** HTML5, CSS3, Bootstrap | **Backend:** Node.js, Express.js, REST APIs

Databases: MySQL, MongoDB | **Tools:** Version Control (Git) and GitHub, VS Code

Concepts: OOP, RESTful APIs, CRUD Operations

Soft-Skills: Problem Solving, Teamwork, Time Management, Adaptability, Leadership, Planning

ACHIEVEMENTS

LPF Scholar (2022), Lila Poonawalla Foundation –Received technical training, soft skills development, and financial support.

CERTIFICATIONS

AMCAT Employability Assessment – Software Engineer (Test ID: 418060604163240) – Aspiring Minds (AMCAT) | January 2026
Validated skills in Software Engineering, IT Services, and Technical Operations.

Front-End Web Development Internship in collaboration with AICTE, implemented by Edunet Foundation (21 Aug – 20 Sep 2025)
– Created a personal portfolio website using HTML, CSS, and JavaScript during the Front-End Web Development internship.

Web Development Virtual Internship – EduSkills (May – June 2025) -Built responsive web pages using HTML, CSS, JS.

Data Analytics Job Simulation – Deloitte -(8 July 2025) - Completed practical tasks in data analysis and forensic technology. Applied analytical skills to simulate real-world business problem-solving using datasets.

GenAI Powered Data Analytics Job Simulation – Forage (Sept 2025) - Completed hands-on tasks in AI-based data analysis, risk profiling, and business strategy development.

Full Stack Development – Udemy -(18 Jan 2025) - Learned JavaScript Fundamentals to advanced & Full Stack Development.

ACADEMIC PROJECTS

AI-Powered Automated Timetable Generation System (Spring Boot, MySQL, Python, HTML, CSS, JavaScript)

- Developed an intelligent academic scheduling system to automate timetable generation and subject allocation using Constraint Satisfaction Problem (CSP) techniques.
- Implemented multiple allocation algorithms such as FCFS, Priority-Based, and Round Robin to ensure fair elective distribution.
- Built RESTful APIs and a role-based system (Admin, Staff, Student) for efficient resource and user management.
- Reduced scheduling conflicts and manual effort by automating faculty, classroom, and subject allocation processes.

Cab Booking System (JavaScript, HTML, CSS, Bootstrap, MongoDB)

- Developed a cab booking web application with features for ride booking, tracking, and management.
- Designed and implemented RESTful APIs for booking, driver allocation, ride tracking, and fare management.
- Built an admin dashboard to manage users, drivers, and ride history efficiently.
- Optimized MongoDB queries, improving API response time by approximately 30%.
